Aerobiological Information Systems and allergic respiratory disease management AIS LIFE
(AIS LIFE LIFE13 ENV/IT/001107)

Annual meeting

Vienna _ Austria
19-20 of June 2015

Critical questions

RNSA and MUW

Critical questions

1. **Measurement of ultrafine particles** – equipment - ?
2. **Measurement of pollutants** – data from one „representative" station (criteria - ?) or average of data from the all stations in region?
3. **Pollen data from Pisa** – all pollen data have to be in EAN database - it is necessary for running the PPI
4. **Forecasting of symptoms using the DEX system.**
   - Selection of persons in every region who will be responsible for the DEX system
   - Education by skype, when?
5. **When do we start?**
   - Data collection (pollen, weather, pollutants, UFP(?)) - **from March 2015**? (A1 and C1 actions)
   - Patients output (user acceptance, user perception, improvement of the quality of life (QoL) of users, decrease of symptoms load…) – **from August 2015**? (B1, B2 and C1 actions)

Critical questions

6. Patients selection – Pisa, Paris, Lyon and Vienna (B1 and B2)

PHD Vienna datasets 2015: user – 2385 with 29612 days
PHD Paris datasets 2015: user – 275 with 3133 days
PHD Lyon datasets 2015: user – 272 with 4216 days

Why do not use or ask user?

7. Dividing of selected patients in three group - control group? (B1 and B2)

8. Dissemination of the AIS Life information and questionnaires – in person, email, AIS web site, another website… (B1, B2 and D actions)
